# 250 KIDS SERIES

## SCOTT 250 KIDS JERSEYS

**MATERIAL:** 100% Polyester

**FEATURES:**

- + All New Graphic Design
- + Dual Layer V-neck Collar
- + Raglan Sleeve with padded elbow
- + Lycra Cuff for snug fit

**SIZES:** S-L

## SCOTT 250 KIDS PANTS

**MATERIAL:** 3 Types of Spandex, Mesh Liner, Leather Inner Knee, And Ballistic Nylon Outer Knee

**FEATURES:**

- + All New Graphic Design
- + Articulated Pre Bent Fit in rider attack position
- + Dual waist adjustment
- + Ribbed Spandex upper knee
- + Leather Inner knee for durability
- + Natural Cuff

**Sizes:** 22-28

## SCOTT 250 KIDS GLOVES

**MATERIAL:** Top Hand-Spandex, Palm-Poly Blend, Neoprene Cuff

**FEATURES:**

- + All New Design
- + Dual layer palm for maximum protection
- + Hook and loop closure
- + Silicone Tacky Lever Grip

**SIZES:** XS-L

# GOGGLES

THE ALL NEW

# TYRANT GOOGLE

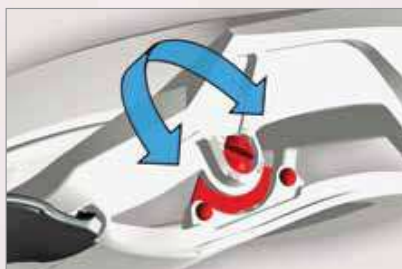

FEATURING  
THE SCOTT  
FIT SYSTEM

## FURTHER INNOVATION OF SCOTT GOOGLES

The new Tyrant Goggle has been carefully engineered to achieve optimum fit, moisture management, and venting. For ease of use, the SCOTT Fit System can now be accessed on the outside of the goggle. To further improve comfort, outriggers have been added to more evenly distribute goggle tension, and to manage perspiration, the Tyrant comes equipped with our proven No Sweat 3.2 face foam. Additionally, we've redesigned our patented RAM air venting system to provide optimal airflow inside the goggle to prevent lens fogging. This goggle also features our exclusive adjustable nose guard and comes with either a clear or chrome WORKS lens.

### SCOTT FIT SYSTEM

- Located on the outside of the goggle frame, the patent pending SCOTT Fit System creates a custom face and nose fit.

### ADJUSTABLE NOSE GUARD

- Exclusive to SCOTT, the Adjustable Nose Guard on the Tyrant adjusts in three different positions allowing riders to configure the guard exactly to their liking.

### RAM VENTING

- Revolutionary Air Management (RAM) is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating "swirling air" and fogging.

Scott knows optics and we realize that vision is a key component to your success in sport. Since 1970, Scott has delivered the highest quality goggles to competitors and enthusiasts in both motocross and wintersports. SCOTT Precision Optics represent a strategic blend of superior materials and manufacturing which result in the highest quality, distortion free, UV protected, performance lenses available in the market today. SCOTT Precision Optics are found in all Scott eyewear products.

## MOTOSPORT LENS MATERIALS

### SCOTT TruView LENSES

SCOTT TruView lenses are lightweight and block 100% of harmful UV rays. TruView lenses pass SCOTT's strict testing procedures delivering high-quality, performance lenses in select SCOTT goggles.

## GOGGLE FEATURES

### No Fog™ Lens Treatment

Scott lenses undergo a permanent No Fog™ treatment process to prevent condensation and fogging.

### 100% UV Protection

Scott lenses are optically engineered to screen out 100% of harmful UVA/UVB/UVC rays.

### NoSweat 3.2 Face Foam, Multi-Layer Face Foam, Hypoallergenic Super-Soft Face Foam

NoSweat 3.2 Face Foam is Scott's best face foam, incorporating three-layers of foam delivering a precise and comfortable fit. Multi-Layer face foam and hypoallergenic super-soft face foam are engineered to form a precise fit around facial features while sealing out the elements.

### Helmet Compatibility

Scott goggles are engineered to engage flawlessly with a variety of helmets.

### Revolutionary Air Management (RAM)

RAM is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating "swirling air" and fogging.

### Air Control System (ACS)

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

### Fit System

The Patent Pending SCOTT FIT SYSTEM is a one time mechanical adjustment that creates a custom face and nose fit. Two pivot points located at the bottom of each side of the goggle can be adjusted in four positions allowing the goggle to fit tightly against the rider's face. Found on Hustle and Tyrant goggles.

### Over The Glasses (OTG)

OTG Goggles offer protection from the elements and an optimized fit for people requiring prescription glasses.

### Adjustable Nose Guard

Exclusive to SCOTT, the Adjustable Nose Guard on the Tyrant adjusts in three different positions allowing riders to configure the guard exactly to their liking.

# LENS CONSTRUCTION

**STANDARD LENSES**  
Standard single lenses are constructed from polycarbonate material to maintain impact resistance and provide 100% UV protection. Standard lenses do not include tearoff posts.

**WORKS LENSES**  
WORKS single lenses are built with factory installed WORKS adjustable tearoff pins and can adapt to fit the WORKS film system. WORKS lenses are made from polycarbonate material to maintain impact resistance and provide 100% UV protection.

**THERMAL LENSES**  
A dual pane lens designed to separate the warm air in the goggle chamber from the chilly air outside. All Thermal lenses feature Scott's No-Fog™ Lens Coating, polycarbonate material to maintain impact resistance and provide 100% UV protection. Thermal lenses do not include tearoff posts.

**WORKS THERMAL LENSES**  
Feature WORKS lens technology on a dual pane lens, ideal for cold temperature or high moisture race conditions. WORKS Thermal lenses are made from polycarbonate material to maintain impact resistance and provide 100% UV protection.

**ACS LENSES**  
A thermal lens featuring Scott's ACS offset vent holes in the lens to further decrease fogging. ACS lenses are made from polycarbonate material to maintain impact resistance and provide 100% UV protection.

# FACE FOAM CONSTRUCTION

## | NoSweat 3.2 Face Foam [Patent Pending]

NoSweat 3.2 Face Foam system channels sweat away from the face while relieving pressure from the nose to provide the most advanced sweat protection and comfortable fit on the market. The first foam system integrates the proven 3-layer NoSweat foam across the top half of the goggle. The first layer channels sweat away from the face; the middle layer absorbs sweat; the third fleece layer creates a comfortable fit and seal. The second foam system bonds 2-layer foam to the lower half of the goggle. The first layer of high volume contour molded foam provides cushioning and absorbs sweat. The second fleece layer creates a comfortable fit and seal.

## | Multi-Layer Face Foam

Scott's Multi-Layer Face Foam incorporates two layers of foam and one layer of fleece, delivering a comfortable performance fit. The first layer features maximum sweat retention properties and provides cushioning from the frame while the second layer ensures a precise comfortable face fit. The third layer provides a comfortable barrier between the goggle and rider's face.

## | Hypoallergenic Super-Soft Face Foam

Scott's Hypoallergenic Super-Soft Face Foam provides a precise fit around facial features while sealing out the elements. This single density foam is comfortable and has moisture retention properties.

## | Composite Snow Face Foam

Composite Snow Face Foam is designed specifically to combat winter elements. The oversized face foam completes the helmet/eye-port seal, reducing cold spots on the face. This 3-Layer Composite foam places a super soft fleece layer against the face combined with 2 outer layers engineered to form a high speed wind barrier and precise fit.

SCOTT ARMOR COMMANDER BODY in Black  
# 221210

# PROTECTION

# NECK BRACE

Neck injuries can be of the most serious upper body injuries. The SCOTT NECK BRACE was engineered in collaboration with Leatt®, the market leader and pioneer of the “helmet for your neck”. It functions in conjunction with your helmet and is designed to help protect your neck from extreme movements and overall neck loading in the event of an accident. The SCOTT NECK BRACE is engineered with Leatt®’s proven Alternative Load Path Technology™ (ALPT™) and features seamless integration of function, movement and looks.

## ALPT: Alternative Load path Technology.

All Scott-Braces help protect riders from 5 types of head/neck impacts by employing Alternative Load Path Technology™. This innovation helps disperse the energy, typically transferred to the neck, resulting from an impact to the head\* and assists in the transferring of forces away from the vulnerable neck structures to less vulnerable areas of the body and is pivotal in the design of all Scott neck Braces.

In a typical face-plant type accident without a Scott Neck Brace, the force of the impact is transferred from the ground to the helmet, through the helmet to the skull and skull base where it is then transferred through the neck to the back (thoracic spine). With the Scott-Brace fitted, the force will instead transfer from the ground to the helmet, through the helmet onto the Scott Neck Brace once contact is made, some of the force will therefore be transferred to the brace and dispersed to the less vulnerable parts of the torso. If the impact is significant enough, the brace is designed to fail in crumple zones (similar to those seen in cars), thereby helping to absorb some of the energy of the impact.

## The Scott Neck Brace helps protect against the following main scenarios:

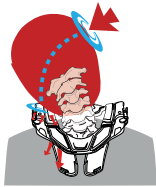

Hyperextension: Extreme bending of the head in a rearward direction. Hyperflexion: Extreme bending of the head in a forward direction.

Lateral Hyperflexion: Extreme bending of the head to one side Posterior Hypertranslation: Movement of the head relative to the neck, at ninety degrees to the neck.

Coupled Axial Loading: Helps prevent axial loading only when the axial forces act in combination with other mechanisms. As an example, this typically occurs when your head is forced downward and forward (Hyperflexion) or downward and backward (Hyperextension).

**HYPEREXTENSION:**  
over-bending of the head in rearward direction.

**LATERAL HYPERFLEXION:**  
over-bending of the head to one side.

**POSTERIOR HYPERTRANSLATION:**  
extreme movement of head and helmet, rearward on the neck.

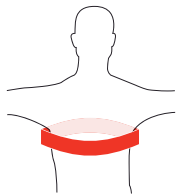

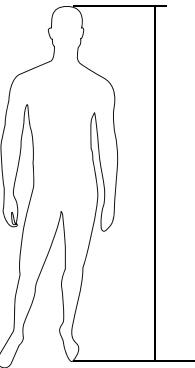

**COUPLED AXIAL LOADING:**  
Helps prevent axial loading only when the axial forces act in combination with other mechanisms.

**HYPERFLEXION:**  
over-bending of the head in forward direction.

## SCOTT NECK BRACE CARBON PRO

#223738

The Neck Brace Scott Carbon neck brace is the pinnacle in neck brace technology! The Carbon Pro brace features a fully ventilated carbon-fiber chassis with completely redesigned, open-cell padding. The Carbon Pro Brace is the lightest, most ventilated and most comfortable brace ever designed.

- + Kevlar® reinforced Carbon Fiber Matrix chassis
- + New shape, lower-profile padding for improved range-of-motion
- + The greatest range of motion of any Scott Neck Brace®
- + New open celled light weight Velcro-free padding is removable & washable.
- + CE certified PPE directive 89/686/EEC
- + Alternative Load Path Technology™, engineered by Leatt®
- + Compatible with all full face helmets
- + Thoracic strut engineered to snap in severe impact scenarios
- + Engineered collarbone cutout to help keep your helmet and brace away from one of your most fragile bones.
- + Two red anodized CNC spring loaded aluminium hinges. Its bright red color ensures easy identification by paramedical personnel in an emergency situation
- + Crumple zone
- + Biomechanical padding to cushion chin
- + Fits with most body armors
- + Easy fit strap system
- + Anatomical design, full adjustable all tools and parts in pack. See to Scott size chart
- + Size S and M
- + The lightest Scott Neck Brace available 550 ± 50g
- + Brace Bag included

## SCOTT NECK BRACE 450

#223737

The Neck Brace Scott 450 is the off-road brace with premium fit thanks to its adjustable front and rear tables. Polycarbonate construction and Biofoam padding with TPR logos unites premium safety with great looks!

- + New shape, lower-profile padding for improved range-of-motion
- + Improved hinge mechanism ensures a more secure closure.
- + Front and back table fully adjustable to accommodate individual rider needs
- + CE certified PPE directive 89/686/EEC
- + Alternative Load Path Technology™, engineered by leatt®
- + Compatible with all full face helmets
- + Thoracic strut engineered to snap in severe impact scenarios
- + Engineered Collarbone cutout to help keep your helmet and brace away from one of your most fragile bones
- + Two red hinges. Its bright red color ensures easy identification by paramedical personnel in an emergency situation
- + Crumple zone
- + Biomechanical padding to cushion chin
- + Fits with most body armors

# SCOTT COMMANDER BODY ARMOR

The Scott Commander provides a full safety with its use of innovative high impact absorbent materials in strategic areas, lightweight, featuring ergonomic fit and unprecedented comfort.

Front

Back

## SCOTT COMMANDER TECHNOLOGY

The Commander Body Armor offers a revolutionary concept providing safety and precise fit.

The innovative shock absorbing materials used on our new Commander allows making it light and thinning on the top of the back to be comfortable when wearing a neck brace.

Our back protector system passed a level 1 CE 1621-2 motorcycle standard, as well the front chest protector passed the CE 14021 standard. It is a fully CE standard approved protector.

### Hard plates with the Neck fit system

Hard plates are made from a plastic material known for high resistance to shock and abrasion. The top back plates are split in two for a better mobility and they are connected with a stretchable link to emphasize the flex between the central plate and the side plate. This helps you to integrate the Neck Brace perfectly on top of the body armour

### High performing impact foam

The foam used on the back of the central plate offers performing shock absorption without compromising the thin thickness and the lightness. Different technical high impact absorbing foams in strategic areas to provide best protection in the important areas.

# SCOTT VERTABRAE PROTECTIVE TECHNOLOGY

(Available on Scott Pursuit and Scott Pursuit SX jacket protector)

The Scott Vertebrae Protective technology combines innovative hard outer plates with a structural layering system allowing the protector to move with your body. The plate system mimics the vertebrae articulating in 3 axes to ensure free lateral, extension and compression movements resulting in complete freedom of movement and the highest level of protection. Our back protector system passed a level 2 CE 1621-2 motorcycle standard making it one of the highest rated protective systems available today. Elbows and shoulders also passed the CE 1621-1 standard, as well the front chest protector passed the CE 14021 standard. It is a fully CE standard approved protector

## Fully articulated hard plates

Hard plates are made from a plastic material known for high resistance to shock and abrasion. The plates are connected using an innovative rivet system allowing the plates to flex with the body. The added, unrestricted flex, maximizes comfort and freedom of movement. Protectors equipped with fully articulated hard plates offer the highest level of safety without sacrificing comfort and performance.

## Honeycomb layer

The lightweight honeycomb layer protects against high-energy impact and increases breathability.

## Structural foam liner

The structural foam layer promotes movement and flexibility, engaging when necessary to protect and distribute shocks over the entire protective surface.

Standard: CE EN 1621-2

# D3O™ TECHNOLOGY

(Available on Scott Soft CR and Soft CR Junior back protectors)

D3o is a patented protective material that combines enhanced chemistry with product engineering to produce high performance shock absorption and impact protection solution.

D3o material contains intelligent molecules that flow freely when moving but shock lock together to absorb impact energy, instantly returning to their flexible state.

The d3o insert included in the Soft CR back protector is low profile, lightweight, flexible and soft.

D3o back protectors allow a complete freedom of movement and mold to your body so you will not even feel like you are wearing a back protector!

## SCOTT PURSUIT JACKET

#217646

### MATERIAL:

- + Plastic plates
- + Internal light honey comb structure
- + Soft high absorbing structural layer

### FEATURES:

- + Aerated and removable plastic backplates - with the Exclusive Scott Vertebrae Protective plates system
- + Chest protector
- + Adjustable elbow and forearm guards
- + Shoulder Width Adjustment
- + Removable zipped sleeves
- + Side Zipper Entry
- + Lumbar Adjustment and Velcro closure
- + Neck brace compatible

### STANDARD:

- + CE EN 1621-2 ( back), CE EN 1621-1 (shoulders, elbows and forarms), CE EN 14021 (chest )

### SIZE:

# GRIPS

## TripleD GRIPS

Triple density or TripleD Grips are manufactured with three densities of the highest quality materials to create the best performing, most durable grips available. Scott's use of a firm-density initial injection maintains the durability of the grip core and end cap. This compound also allows for dependable grip to bar adhesion. The medium-density second injection layer delivers maximum comfort and durability. The third soft-waffle injection layer delivers the comfortable final grip surface increasing vibration damping and reduces fatigue, thus minimizing arm pump. The combination of these three distinct layers ensures that Scott TripleD grips simply perform better and longer than the competition's.

### FEATURES

- + Firm-density tear-resistant end cap prolongs grip life
- + Medium-density layer delivers maximum comfort and durability
- + Soft-density layer reduces vibration, arm pump and fatigue
- + Integrated safety wire channel

## DoubleD GRIPS

Double density or DoubleD Grips combine two densities of the highest quality materials to create durable performance grips. The medium-density core ensures maximum comfort and durability. The soft-density body reduces arm pump and overall fatigue. Scott DoubleD grips are classically designed to perform for motocross and off-road riding.

### FEATURES

- + Firm-density tear-resistant end cap prolongs grip life
- + Medium-density layer delivers maximum comfort and durability
- + Soft-density layer reduces vibration, arm pump and fatigue
- + Integrated safety wire channel

## Singled GRIPS

Single Density or SingleD Grips employ one density injection in a variety of patterns. SingleD grips are offered in soft or medium densities. The soft density compound reduces vibration, arm pump and fatigue. The medium density compound delivers the maximum durability without sacrificing comfort. SingleD grips are trusted motocross grips, which are proven performers in all mx and off-road riding conditions.

### FEATURES

- + Soft-density reduces vibration, arm pump and fatigue
- + Medium-density delivers maximum durability without sacrificing comfort
- + Integrated safety wire channel

## SCOTT DIAMOND

#218130 | 12 PACK

- + Triple density grip
- + Full diamond/half waffle design
