# 2012 SCOTT SNOWMOBILE

The 2012 SCOTT Snowmobile line is the perfect combination of fashionable and technical gear whether you race, ride, or tour. All of our jackets and pants feature waterproof, breathable Gore Tex or triPhase membranes to keep you warm, dry, and having fun. The Racing segment draws inspiration from our industry leading motocross line. SCOTT Snowmobile Race Apparel offers a perfect combination of technical materials and performance fits designed for those who aren't afraid to ride fast.

Our Freeride line is designed to satisfy the needs of those who spend their days hunting for big air and deep powder. Technical features are designed to weather the backcountry, while trend setting colors and perfect fit, keep you looking great. Whether you're out for a relaxing tour or gunning for the next ridgeline, our Sport Touring line provides you the layering options you need to keep you comfortable all day long, no matter what the weather throws at you.

SCOTT's 2012 Snowmobile line is the best of Innovation, Technology, and Design. If you're on a snowmobile, we've got you covered.

2012 SCOTT  
SMB WORKBOOK

## INTRODUCING THE SCOTT FIT SYSTEM

The patent pending SCOTT FIT SYSTEM is a one time mechanical adjustment that creates a custom face and nose fit. Two pivot points located at the bottom of each side of the goggle can be adjusted in four positions allowing the goggle to fit tightly against the rider's face.

With multiple fit options and unbeatable performance, the SMB HUSTLE GOGGLE with FIT SYSTEM technology hails a new generation of SCOTT goggles.

# GOGGLES FEATURES

Scott Precision Optics represents a strategic blend of superior materials and manufacturing which result in the highest quality, distortion free, UV protected, performance lenses available in the market today.

Scott OptiView lenses are manufactured in Europe and adhere to the strictest testing standards. Scott's proprietary injection molding process and hard coat treatment guarantees that every OptiView lens is optically correct.

Scott TruView lenses are lightweight and block 100% of harmful UV rays. TruView lenses pass Scott's strict testing procedures delivering high-quality, performance lenses in select Scott goggles.

## 100% UV Protection

Scott lenses are optically engineered to screen out 100% of harmful UVA/UVB/UVC rays.

## Air Control System (ACS)

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

## No Fog™ Anti-Fog Lens Treatment

Scott lenses undergo a permanent No Fog™ treatment process to prevent condensation and fogging.

## Scott Fit System

The Patent Pending Scott Fit System is a onetime mechanical adjustment that creates a custom face and nose fit.

## Revolutionary Air Management System (RAM)

RAM is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating "swirling air" and fogging.

## Helmet Compatibility

Scott goggles are engineered to engage flawlessly with a variety of helmets.

## Face foams

### Composite snow face foam

Composite Snow Face Foam is designed specifically to combat winter elements. The oversized face foam completes the helmet/eye-port seal, reducing cold spots on the face. This 3-Layer Composite foam places a super soft fleece layer against the face combined with 2 outer layers engineered to form a high speed wind barrier and a precise fit.

### Big hypoallergenic Face Foam with windproof membrane

This extra soft face foam incorporates a PU layer between the foams to deliver the highest level of protection against wind and cold. Its oversized face foam ensures a comfortable fit and precise seal around the face.

### Hypoallergenic Soft Face Foam

Thanks to its oversized shape, Scott's Hypoallergenic Soft Face Foam provides a comfortable fit and a precise seal around the face. This super soft single density foam also reduces cold spots on the face.

# LENSES COLOR OPTIONS

## CLEAR

All-weather performance lens with 100% UV protection.

LIGHT TRANSMISSION 90%  
Cat 0

## CLEAR ANTI-STICK

All-weather performance lens with 100% UV protection. This lens is used specifically with the WORKS film system to prevent the film from sticking to the lens.

LIGHT TRANSMISSION 90%  
Cat 0

## GREY

Glare reducing lens excels in medium to bright light.

LIGHT TRANSMISSION 49%  
Cat 1

## SKY

All around lens, which increases contrast and definition, excels on medium-light and overcast days.

LIGHT TRANSMISSION 53%  
Cat 1

## YELLOW

Low-light lens excels in stormy conditions by providing increased contrast and definition.

LIGHT TRANSMISSION 71%  
Cat 1

## AMPLIFIER ROSE

The patented Amplifier Rose lens is capable of deciphering exceptional detail in low light conditions while adapting perfectly for use on sunny days.

LIGHT TRANSMISSION 47%  
Cat 1

## SNOW PEACH

The snow peach lens is a orange tinted lens for an improved depth perception in flat light conditions and mildly clouded days.

LIGHT TRANSMISSION 32%  
Cat 2

## NL-40

NL-40 performs in a variety of light conditions. The exceptional contrast detail allows the NL-40 to excel on overcast and flat light days.

LIGHT TRANSMISSION 40%  
Cat 2

## NL-45

NL-45 performs in a variety of light conditions. The exceptional contrast detail allows the NL-45 to excel on overcast and flat light days.

LIGHT TRANSMISSION 45%  
Cat 1

## BLUE CHROME

Blue Chrome is a great option for sunny to medium light days. The silver chrome coating reduces glare on this exceptionally contrasting lens.

LIGHT TRANSMISSION 21%  
Cat 2

## SILVER CHROME

Silver Chrome is a great option for sunny to medium light days. The silver chrome coating reduces glare on this exceptionally contrasting lens.

LIGHT TRANSMISSION 27%  
Cat 2

## NL-32 BLACK CHROME

Whether it is a sunny morning or a cloudy afternoon, the NL-32 Black Chrome lens is the choice for everyday optical perfection with a glare cutting chrome coating.

LIGHT TRANSMISSION 32%  
Cat 2

## Helmet Size Chart

SIZE	CENTIMETER	INCHES	HAT SIZE
XS	53-54	21 1/4	6 5/8 - 6 3/4
S	55-56	21 5/8	6 7/8 - 7
M	57-58	22 3/8	7 1/8 - 7 1/4
L	59-60	23 1/8	7 3/8 - 7 1/2
XL	61-62	23 1/2	7 5/8 - 7 3/4
XXL	63-64	24 1/4	8

## HELMET SIZING TIPS

1. Start by wrapping a measuring tape around your head about a half-inch above your eyebrows.
2. Since a helmet should be snug so it doesn't pop off your head if you crash, you need to pull the tape comfortably tight in order to achieve the best results.
3. Make sure you get precise results by measuring two to three times trying to get the same result every time. If you get different measurements take the largest one.

# APPAREL

APPAREL

2012 SCOTT  
SMB WORKBOOK

## 2012 SMB TECHNOLOGIES

Snowmobiling is an active sport meeting the most extremes conditions. At SCOTT, snowmobile is a passion and we will never leave a room for the doubts; all our snowmobile apparel has been rigorously engineered and tested to face extreme conditions while snowmobiling; this is why all our apparels are using waterproof/windproof and breathable membrane answering the highest specifications snowmobilers request. Scott has been a pioneer in innovation, technology, design and continues every day to engineer exclusive products so you can expect the best products for most extreme conditions.

**GORE-TEX®** fabric is the most durable waterproof, windproof and breathable fabric available. GORE-TEX® membrane contains 1,4 billion tiny pores per square centimeter. That is why water doesn't penetrate the fabric, but moisture wicks away from the skin effectively. All seams are sealed with Gore-Seam tape to provide totally waterproofness. All GORE-TEX® garments are made according to standards of Guarantee to Keep You Dry™ program. Breathability value for GORE-TEX® products is approximately 15'000 gr/m2/24h and waterpilar value 45'000mm.

**triPHASE (TP)** is a waterproof, breathable technology used by the Scott ITD department to meet all industry standards. triPHASE keeps you dry, the breathability gives excellent comfort, all together giving you perfect climate control management. All our membranes are seam taped which will keep you away from external extremes conditions.

**Cordura®** is a very durable and abrasion resistant fibre (PA 6.6) which appears in different fabric strength and quality. Within our snowmobile collection we use the following Cordura qualities:

- **Cordura® 500d** best known Cordura quality
- **Cordura® 300d** durable Cordura quality

**Thermolite®** Base provides warmth and comfort without weight, even when wet. It's the lightweight fabric that provides heavy-duty performance and wearers stay drier because it dries 20% faster than other insulating fabrics, and 50% faster than cotton.

**Polartec® Power Stretch®** fabrics feature body-hugging 4-way stretch and are very breathable. It keeps you dry when you sweat and provides warmth without weight.

**Polartec® Power Dry®** fabrics are designed to keep your skin dry when you sweat. Thanks to superior wicking action, high breathability and a quick drying function these pieces always feel comfortable next to skin.

## APPAREL SIZE CHART

**For C-Model**, the average difference between chest and waist is 12cm: body chest size – body waist size = 12cm  
**For D-Model**, the average difference between chest and waist is 6cm: body chest size – body waist size = 6cm

## THE NEW GORE COMFORT MAPPING TECHNOLOGY

The GORE-TEX® comfort mapping technology improves your comfort by design, strategically using different GORE-TEX® fabrics at specific locations in the garment and is featured in the men's and women's Cascadia jacket and new in the men's and women's Mercurial pant. Viewing the human body as a map with several different climatic zones, specific GORE-TEX® fabrics are uniquely combined to increase breathability, comfort against the skin, warmth and fit, precisely where they are needed most. In this way, garments with comfort mapping technology can adapt to perfectly meet the needs of the wearer's body. Comfort mapped garments work with advanced seamsealing techniques to reliably combine different fabric types inside the garment.

# GLOVES

## GLOVES TECHNOLOGIES

**GORE-TEX®** gloves keep hands warm and dry by providing durably waterproof and windproof protection and breathability. GORE-TEX® gloves are ideal for cold and wet conditions.

**WINDSTOPPER®** fleece provides a perfect barrier against wind with less bulk but with maximum breathability.

**HIPORA®** waterproof inserts use a unique polyurethane film technology that maximizes value and comfort. HIPORA® shuts out water from the outside, keeping hands warm and dry on the inside.

**CORDURA®** is a high-performance fabric resistant to abrasions, tears and scuffs. CORDURA® is two times more durable than standard nylon and three times more durable than polyester.

Water and abrasion resistant, **PITTARDS®** leather is specifically developed with a water repellent structure to keep the hand dry under the most adverse conditions. It is designed to offer optimum strength and durability.

The new GORE-TEX® Gloves with **XTRAFIT™ PRODUCT TECHNOLOGY** are the ideal solution for racing and sporty use. The membrane and lining are securely attached to each other and there is grip tape placed between the insert and outer material in the fingertips. The result is optimum grip when you need it and softness and comfort when you don't. Of course GORE-TEX® Gloves with Xtrafit™ Product Technology are also waterproof, windproof and highly breathable.

## SCOTT'S INNOVATIVE TECHNOLOGY, THE VERTABRAE PROTECTIVE SYSTEM

Designed to follow the movements of the spine, the back panel designed with the Vertebrae Protective System is able to twist in 3 axes. The system allows for lateral, extension and compression movement without obstruction. It also ensures that the protector remains in its original position during riding to keep you continually protected.

## BACK PROTECTOR SCOTT SOFT-CR

↳ 220412

BLACK

## d3o™ TECHNOLOGY

### How does d3o™ material work?

d3o™ is a patented material with intelligent molecules. It flows with you as you move but locks together on impact to absorb energy and protect you.

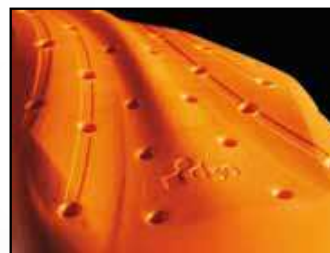

Intelligent molecules lock together on shock

This unique innovative component provides an optimal freedom of movement and surpasses CE standards.

### Increased Comfort and Mobility.

At only 11mm thick, d3o™ back protection is low profile, lightweight, flexible and soft.

d3o™ protectors allow for complete freedom of movement and mold to your body so you will not even feel like you are wearing a back protector.

### SCOTT Specific Design

SCOTT CR Back Protectors feature SCOTT's unique 3D mesh back that increases breathability. The adjustable belt helps you customize the fit.

## KNEEGUARD SCOTT MX

↳ 217775

### MATERIAL

S-XXL

BLACK

A man with a beard is wearing a black beanie with a white stripe and a green, white, and grey plaid jacket. He is standing in front of a large window that looks out onto a snowy landscape with evergreen trees. The jacket has two chest pockets with flaps and a small logo on the left chest. The background is a soft-focus view of a winter scene.

BAGS

2012 SCOTT  
SMB WORKBOOK

The new Travel Series is highly appealing not only because of its sporty, yet elegant look, but mainly due to its new design. The flooring of the wheeled bags is produced entirely of a thermo-formed shell that better protects your contents and prevents the demands of travel from showing up as nicks and dings on your bag.
