# SCOTT GOGGLES

SCOTT SNOWMOBILE GOGGLES DRAW ON OUR EXTENSIVE EXPERIENCE CREATING BOTH WINTERSPORT AND MOTOSPORT GOGGLES TO DELIVER A COMFORTABLE FIT, EFFORTLESS PERFORMANCE, AND SPORT-SPECIFIC FEATURES SUCH AS THE POLAR SHIELD NOSE/FACE GUARD.

GOGGLE FEATURES

	<b>SCOTT FIT SYSTEM</b> The patent pending SCOTT FIT SYSTEM is a mechanical adjustment located at the bottom of each side of the goggle allowing you to choose between four positions to get a customized face and nose fit.
	<b>OVER THE GLASSES (OTG)</b> OTG Goggles offer protection from the elements and an optimized fit for people requiring prescription glasses.
	<b>HELMET COMPATIBILITY</b> Scott goggles are engineered to engage flawlessly with a variety of helmets.
	<b>REVOLUTIONARY AIR MANAGEMENT SYSTEM (RAM)</b> RAM is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating “swirling air” and fogging.
	<b>NO-SLIP SILICONE STRAP</b> An adhered silicone strip on the inside of the goggle strap ensures the goggles stay right where they should on a helmet.

LENS FEATURES

	<b>SCOTT PRECISION OPTICS</b> is a quality label which stands for premium materials and innovative manufacturing techniques. This unique combination enables us to offer distortion free, UV protected, high performance lenses of the best quality.
	<b>SCOTT OPTIVIEW</b> lenses are manufactured in Europe and adhere to the strictest testing standards. Scott’s proprietary injection molding process and hard coat treatment guarantees that every OptiView lens is optically correct.
	<b>SCOTT TRUVIEW</b> lenses are lightweight and block 100% of harmful UV rays. TruView lenses pass Scott’s strict testing procedures delivering high-quality, performance lenses in select SCOTT goggles.
	<b>100% UV PROTECTION</b> All Scott lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.
	<b>NO FOG™ ANTI-FOG LENS TREATMENT</b> Scott lenses undergo a permanent No Fog™ treatment process to prevent condensation and fogging.
	<b>AIR CONTROL SYSTEM (ACS)</b> ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

FACE FOAM CONSTRUCTION

BIG HYPOALLERGENIC FACE FOAM WITH WINDPROOF MEMBRANE

This extra soft face foam incorporates a PU layer between the foams to deliver the highest level of protection against wind and cold. Its oversized face foam ensures a comfortable fit and precise seal around the face.

BIG HYPOALLERGENIC FACE FOAM

Thanks to its oversized shape, Scott’s Hypoallergenic Soft Face Foam provides a comfortable fit and precise seal around face. This super soft single density foam also reduces cold spots on the face.

SCOTT FIT SYSTEM

Located on the outside of the goggle frame, the patent pending Scott Fit System creates a custom face and nose fit.

RAM VENTING

Revolutionary Air Management (RAM) is a patented frame ventilation system that directs airflow within the goggle by using a clean and controlled top-to-bottom pattern, eliminating “swirling air” and fogging.

## THERMAL LENSES

A dual pane lens designed to separate the warm air in the goggle chamber from the chilly air outside. All Thermal lenses feature Scott's No-Fog™ Lens Coating, polycarbonate material to maintain impact resistance and provide 100% UV protection. Thermal lenses do not include tear-off posts.

## ACS LENSES

A thermal lens featuring Scott's ACS offset vent holes in the lens to further decrease fogging. ACS lenses are made from polycarbonate material to maintain impact resistance and provide 100% UV protection.

SCOTT 450 NECK BRACE

223737

FEATURES

- + New shape, lower-profile padding for improved range-of-motion
- + Improved hinge mechanism ensures a more secure closure.
- + Front and back table fully adjustable to accommodate individual rider needs
- + CE certified PPE directive 89/686/EEC
- + Alternative Load Path Technology™, engineered by leatt®
- + Compatible with all full face helmets
- + Thoracic strut engineered to snap in severe impact scenarios
- + Engineered Collarbone cutout to help keep your helmet and brace away from one of your most fragile bones
- + Two red hinges. Its bright red color ensures easy identification by paramedical personnel in an emergency situation
- + Crumple zone
- + Biomechanical padding to cushion chin
- + Fits with most body armors
- + Easy fit strap system
- + Anatomical design, full adjustable all tools and parts in pack according to Scott size chart
- + 790g +/- 50g

MATERIAL

- + Fibreglass reinforced polyamide resin
- + Carbon-fibre, reinforced with Kevlar®
- + Shock absorbing Biofoam

SIZE: S, M

## APPAREL TECHNOLOGIES

Scott garments engineered with **GORE-TEX®** products are durable waterproof, windproof and highly breathable.

GORE-TEX® products are created by laminating the GORE-TEX® membrane to high-performance textiles. In order to guarantee a waterproof product, the seams on the entire garment are sealed with GORE-SEAM® tape technology.

- + Provides breathable comfort and durably waterproof and windproof protection.
- + A specific GORE-TEX® membrane is freely suspended between the outer material and the lining of the jacket.
- + It can easily be combined with thermal insulating lining materials ideal for fashion applications.
- + Ideal for fashion applications.

**GORE-TEX® Performance Shell with Z-Liner**

**triPHASE (TP)** is a climate control technology based on a PU (polyurethane) membrane developed exclusively by Scott Sports. The construction offers a high level of breathability while also keeping a rider's body climate comfortable by managing outside elements that he or she might encounter. Windproof and waterproof features protect in all weather conditions while breathable aspects allow moisture and vapor to escape to maintain the highest level of comfort. According to Scott requirements, the 3-layer and Z-liner constructions are tested under extreme conditions before being approved for use in Scott Motorsports products. **A PROMISE FOR YOUR RIDE.**

### SCOTT ALL-YEAR-ROUND

Represent functional pieces in Scott's technical outerwear intended for year round use. No matter what the season is, the pieces selected as All Year Round provide performance and versatility.

### ODOR RESISTANT

Look for this icon for fabrics that have anti-odor properties. Some fabrics are naturally odor-resistant, while other garments use Polygiene® or Chitosante treatment processes. These treatments are natural, environmentally-friendly agents that are used to treat fabrics, allowing garments to be microbial, bacterial and fungal resistant.

DRYOsphere

### DRYOsphere

DRYOsphere fabrics provide a waterproof/windproof/breathable barrier, protecting you from the elements. Combined with our DRYOzone DWR (Durable Water Repellent), these technologies act as a shield against water and wind, while enabling vapor to escape. This combination of protection and breathability keeps you dry and comfortable in any condition.

**POLARTEC®**  
Power Dry®

### POLARTEC® POWER DRY®

Polartec® Power Dry® fabrics are designed to keep your skin dry when you sweat. Thanks to superior wicking action, high breathability and a quick drying function these pieces always feel comfortable next to skin.

**POLARTEC®**  
Power Stretch®

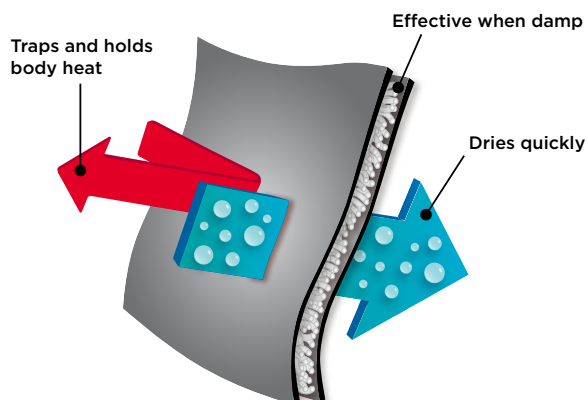

### POLARTEC® POWER STRETCH®

Polartec® Power Stretch® fabrics feature body-hugging 4-way stretch and are very breathable. It keeps you dry when you sweat and provides warmth without weight.

### Thinsulate™ insulation

The original warmth without bulk insulation. Inch for inch no insulation keeps you warmer than Thinsulate™ insulation. When you compare equal thicknesses, Thinsulate™ insulation provides up to twice the warmth of other high-loft insulating materials and nearly one and a half times the warmth of down.

**3M™ Thinsulate™ Insulation**  
The insulation that's thin, light, warm

## BOOTS TECHNOLOGIES

**triPHASE (TP)** is a climate control technology based on a PU (polyurethane) membrane developed exclusively by Scott Sports. The construction offers a high level of breathability while also keeping a rider's body climate comfortable by managing outside elements that he or she might encounter. Windproof and waterproof features protect in all weather conditions while breathable aspects allow moisture and vapor to escape to maintain the highest level of comfort. According to Scott requirements, the 3-layer and Z-liner constructions are tested under extreme conditions before being approved for use in Scott Motorsports products. **A PROMISE FOR YOUR RIDE.**

## GLOVES TECHNOLOGIES

**GORE-TEX®** gloves keep hands warm and dry by providing durably waterproof and windproof protection and breathability. **GORE-TEX®** gloves are ideal for cold and wet conditions.

**GORE WINDSTOPPER®** outer shell fabric provides a perfect barrier against wind with less bulk but with maximum

**HIPORA®** waterproof inserts use a unique polyurethane film technology that maximizes value and comfort. **HIPORA®** is **WATERPROOF AND BREATHABLE** keeping hands warm and dry on the inside.

**CORDURA®** is a high-performance fabric resistant to abrasions, tears and scuffs. **CORDURA®** is two times more durable than standard nylon and three times more durable than polyester.

**PITTARDS:** Water and abrasion resistant, **PITTARDS®** leather is specifically developed with a water repellent structure to keep the hand dry under the most adverse conditions. It is designed to offer optimum strength and durability.

The new **GORE-TEX®** Gloves with **XTRAFIT™** Product Technology are the ideal solution for racing and sporty use. The membrane and lining are securely attached to each other and there is grip tape placed between the insert and outer material in the fingertips. The result is optimum grip when you need it and softness and comfort when you don't. Of course **GORE-TEX®** Gloves with Xtrafit™ Product Technology are also waterproof, windproof and highly breathable.

**DRYosphere** fabrics provide a waterproof/windproof/breathable barrier, protecting you from the elements. Combined with our **DRYOzone DWR** (Durable Water Repellent), these technologies act as a shield against water and wind, while enabling vapor to escape. This combination of protection and breathability keeps you dry and comfortable in any condition.

**triPHASE (TP)** is a climate control technology based on a PU (polyurethane) membrane developed exclusively by Scott Sports. The construction offers a high level of breathability while also keeping a rider's body climate comfortable by managing outside elements that he or she might encounter. Windproof and waterproof features protect in all weather conditions while breathable aspects allow moisture and vapor to escape to maintain the highest level of comfort. According to Scott requirements, the 3-layer and Z-liner constructions are tested under extreme conditions before being approved for use in Scott Motorsports products. **A PROMISE FOR YOUR RIDE.**

## SCOTT VERTABRAE PROTECTIVE TECHNOLOGY (Available on Scott Pursuit and Scott Pursuit SX jacket protector)

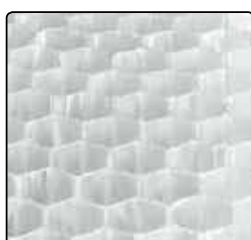

### SCOTT VERTABRAE PROTECTIVE SYSTEM: THE BEST PROTECTION

The Scott Vertebrae Protective Protective System combines innovative hard outer plates with a structural layering system allowing the protector to move with the body. The plate system mimics the vertebrae articulating in three axes to ensure free lateral, extension and compression movements resulting in complete freedom of movement and the highest level of protection.

#### FULLY ARTICULATED HARD PLATES

Made with a plastic material with a high resistance to shock and abrasion. These connect with an innovative riveted system to flex with the body in order to maximize movement.

#### HONEYCOMB LAYER

Lightweight structure that protects high energy impact and ensures maximum breathability.

#### STRUCTURAL LAYER

Smart foam distributes shock over the entire protective surface and promotes movement based on its geometrical shape.

**NEW SCOTT COMMANDER BODY ARMOR**

The Scott Commander sets new standards with innovative, lightweight high impact absorbent materials placed in key areas which offer an adjustable ergonomic fit and unprecedented comfort.

The Scott Commander Body Armor fulfills all required safety standards and offers the all new revolutionary **SCOTT NECK BRACE INTEGRATION CONCEPT** for precise incorporation of your Neck Brace , allowing maximum movement and comfort due to the independent floating thoracic plates (patent pending).

No more complicated adjustments or need to modify/remove plates in order to adapt to a Neck Brace. Just put your Neck Brace on top of the armor and attach with the brace straps and you are ready to go.

**BACK PROTECTOR : CE EN 1621-2 LEVEL 1 CERTIFIED**

**1.FULL LEATT COMPATIBLE**

The top back plates are split in two for a better mobility and they are connected with a stretchable link to emphasize the flex between the central plate and the side plate.

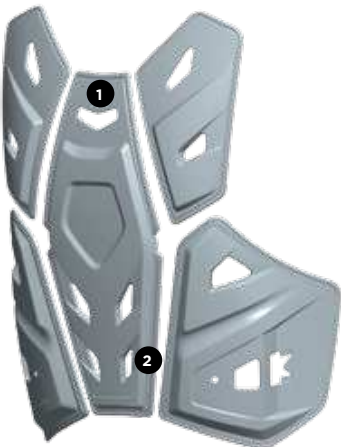

**2.TOTAL MOBILITY**

The slot connections of the plates are wider to allow a better rotational movement and the foam layer has a special shape to ensure greater freedom of movement.

**3.HIGHLY VENTILATED**

The combination between large vents and opened mesh fabric offers more breathability while keeping you cool.

**CHEST PROTECTOR : CE EN 14021 CERTIFIED**

**1.FULL LEATT COMPATIBLE**

The front plates are specially designed to incorporate the Neck Brace.

**2.CONFORTABLE FIT:**

The front is split in 5 protective plates to ensure maximum range of movement To give the perfect fit.

## SCOTT NECK BRACE INTEGRATION CONCEPT (patent pending, available on the Commander Body Armor)

The all new **SCOTT NECK BRACE INTEGRATION** concept with articulating brace plates and the brace strap system offers a perfect incorporation of your Neck Brace without any need of removing plates or modification of the Armor. This is a world first. Just put your Neck Brace on top of the armor and attach with the brace straps and you are ready to go. The innovative shock absorbing materials used on our new Commander allows maximum lightweight construction. The back protector system passes level 1 CE 1621-2 motorcycle standard; as well the front chest protector passes the CE 14021 standard. It is a fully CE standard approved protector.

### ARTICULATED AND HIGH IMPACT RESISTANT PLASTIC PLATES

Hard plates are made from a plastic material known for high resistance to shock and abrasion. The 3 plates system on the back allows perfect incorporation for Neck Braces with the back protector **PATENT PENDING**

### HIGH PERFORMING IMPACT FOAM

The innovative and high absorbing foam used on the back plates offers performing shock absorption without compromising the lightness.

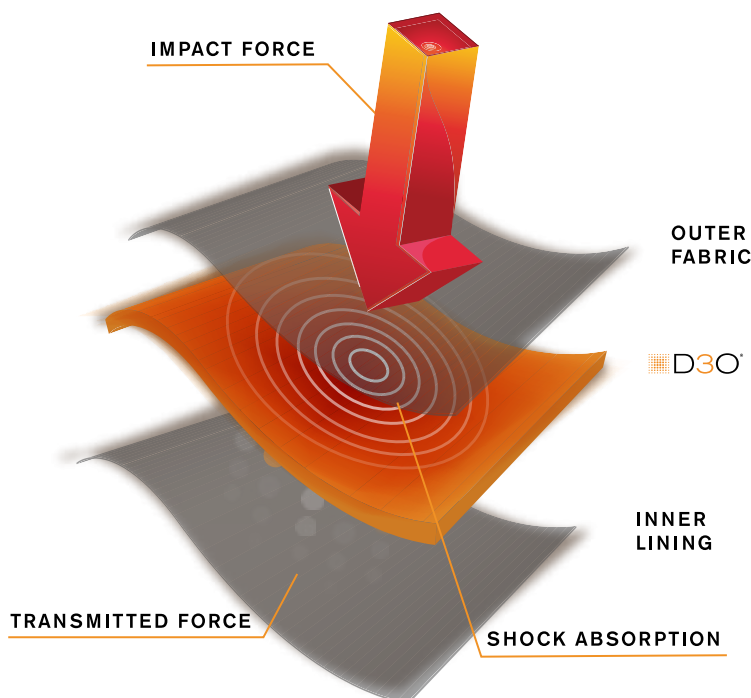

## D3O™ TECHNOLOGY

For years, Scott has worked with our international team of athletes to create the most advanced body protection available today. Our line offers protection for everyday users and for those pushing the limits on and off piste. In a sport that progresses at such an incredible rate, safety is a necessity and not just an option. With the increase in popularity of body protection, Scott is proud to introduce for 2012/13 the Scott Soft Protective System. The Scott specific back panel meets the needs of all condition riders and freestylers while providing a comfortable solution to protection. The hard and soft plate protection line manifest's Scott's continued commitment to protection and performance in every product we produce.

### D3O® SHOCK ABSORBING MATERIAL ON SCOTT SOFTSHELL PROTECTORS:

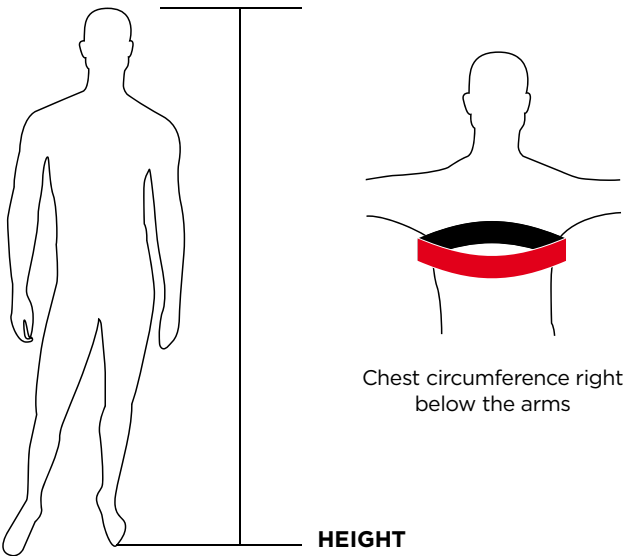

Scott developed a whole collection of soft back protection featuring d3o®. d3o® material is a unique solution with the focus on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergistic effects of the polymer based dilatants. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to distribute energy on throughout the matrix, significantly reducing the effect of impact.

Neck injuries can be of the most serious upper body injuries. The **SCOTT NECK BRACE** was engineered in collaboration with Leatt®, the market leader and pioneer of the “helmet for your neck”. It functions in conjunction with your helmet and is designed to help protect your neck from extreme movements and overall neck loading in the event of an accident. The **SCOTT NECK BRACE** is engineered with Leatt®’s proven Alternative Load Path Technology™ (ALPT™) and features seamless integration of function, movement and looks.

NECK BRACE - SIZE CHART

**ALPT: ALTERNATIVE LOAD PATH TECHNOLOGY**  
All Scott Braces help protect riders from 5 types of head/neck impacts by employing Alternative Load Path Technology™. This innovation helps disperse the energy, typically transferred to the neck, resulting from an impact to the head\* and assists in the transferring of forces away from the vulnerable neck structures to less vulnerable areas of the body and is pivotal in the design of all Scott neck Braces.  
In a typical face-plant type accident without a Scott Neck Brace, the force of the impact is transferred from the ground to the helmet, through the helmet to the skull and skull base where it is then transferred through the neck to the back (thoracic spine). With the Scott-Brace fitted, the force will instead transfer from the ground to the helmet, through the helmet onto the Scott Neck Brace once contact is made, some of the force will therefore be transferred to the brace and dispersed to the less vulnerable parts of the torso. If the impact is significant enough, the brace is designed to fail in crumple zones (similar to those seen in cars), thereby helping to absorb some of the energy of the impact.

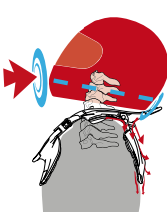

**THE SCOTT NECK BRACE HELPS PROTECT AGAINST THE FOLLOWING MAIN SCENARIOS:**  
**HYPEREXTENSION**  
Extreme bending of the head in a rearward direction.  
**HYPERFLEXION**  
Extreme bending of the head in a forward direction.  
**LATERAL HYPERFLEXION**  
Extreme bending of the head to one side.  
**POSTERIOR HYPERTRANSLATION**  
Movement of the head relative to the neck, at ninety degrees to the neck.  
**COUPLED AXIAL LOADING**  
Helps prevent axial loading only when the axial forces act in combination with other mechanisms. As an example, this typically occurs when your head is forced downward and forward (Hyperflexion) or downward and backward (Hyperextension).

**HYPEREXTENSION**  
over-bending of the head in rearward direction.

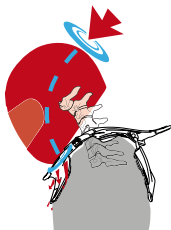

**LATERAL HYPERFLEXION**  
over-bending of the head to one side.

**POSTERIOR HYPERTRANSLATION**  
extreme movement of head and helmet, rearward on the neck.

**COUPLED AXIAL LOADING**  
Helps prevent axial loading only when the axial forces act in combination with other mechanisms.

**HYPERFLEXION**  
over-bending of the head in forward direction

SIZING & FITS

For C-Model, the average difference between chest and waist is 12cm: body chest size – body waist size = 12cm  
For D-Model, the average difference between chest and waist is 6cm: body chest size – body waist size = 6cm
