NOFOG™ ANTI-FOG LENS TREATMENT

SCOTT lenses undergo a permanent NoFog™ treatment process to prevent condensation and fogging.

CAT S2

Unique to the market, SCOTT chrome lenses allow riders the option to select a lens that features a chrome coating and a CAT S.2 tint. These lenses actively reduce the glare effect without sacrificing any visibility or sharpness of vision. Completely versatile, SCOTT chrome lenses are created within the norm for on-road usage.

OFFERED WITH SCOTT WORKS SYSTEM

Competition ready, the premium chrome lenses are made for the easy incorporation of either the WORKS tearoffs or the WORKS Film System.

SCOTT FRAME TECHNOLOGIES

VENTILATION

1 INTEGRATED RAM AIR (RAM)

Through the use of a spoiler behind the air vent the patented RAM frame ventilation system redirects air flow towards the lens, eliminating "swirling air" and fogging

2 RAM AIR PLUG

Exclusive to SCOTT, the adjustable and removable plug enables a full or partial seal of the RAM Air frame openings, allowing the rider to customize his or her ventilation settings

3 ALL AROUND VENTILATION

Frame Ventilation is optimized around the entire frame in order to channel air flow onto the lens, as opposed to the eyes. This technology blocks dirt and water from entering the goggle.

COMFORT

4 NO SWEAT 3.2 FACE FOAM

SCOTT's NoSweat 3.2 Face Foam system channels sweat away from the face while relieving pressure from the nose. The first layer draws sweat away from the face, the middle layer absorbs sweat and the third fleece layer creates a comfortable fit and seal.

3-LAYER FACE FOAM

SCOTT's 3-Layer Face Foam incorporates two layers of foam and one layer of fleece. The first layer maximizes sweat retention and provides cushioning from the frame, the second layer ensures a precise comfortable face fit and the third layer acts as barrier between the goggle and rider's face.

SINGLE LAYER FACE FOAM

SCOTT's Single Layer Face Foam provides a precise fit around facial features while sealing out the elements. This single density foam is comfortable and has moisture retention properties.

INCORPORATING DESIGN

6 ADJUSTABLE NOSE GUARD

Exclusive to SCOTT, the Adjustable Nose Guard on the Tyrant adjusts in three different positions allowing riders to configure the guard exactly to their liking.

7 NO-SLIP SILICONE STRAP

An adhered silicone strip on the inside of the goggle strap ensures the goggles stay right where they should on a helmet.

HELMET COMPATIBILITY

SCOTT goggles are engineered to engage flawlessly with a variety of helmets, including SCOTT's entire helmet line.

FIT

5 FIT SYSTEM

The patented SCOTT Fit System is a mechanical adjustment located at the bottom of each side of the goggle allowing you to choose between four positions, providing a customized face and nose fit.

SCOTT WORKS FILM SYSTEM

1 WORKS LENS

The WORKS Lenses have been engineered for the use of the WORKS tearoffs and the easy integration of the WORKS film system. The tearoff pins can be removed by popping the bottom and top out of the lens and rotating them 90 degrees. Once removed, the WORKS film system canisters fit into the opens, securing the WORKS Film system in place. To return to using tearoffs the system can be removed and the pins replaced.

3 WORKS CANISTERS & FILM

Two canisters, the Motorside and the Supplside secure the WORKS Anti-Stick Grid in place while rolling the film over the lens. Riders can pull the supplside with one hand and still accelerate with the other.

2 WORKS ANTISTICK GRID

The WORKS Anti-Stick Grid ensures a seamless sliding movement of the film over the lens. With an integrated mudflap to prevent water or mud from entering between the film and lens, SCOTT's Anti-stick grid guarantees the user clear sight throughout the entire ride.

4 WORKS HOESHOT TEAR OFF

The WORKS Holeshoot Tear Offs are made specifically for the initial, muddiest part of the race. Easily fitting with the WORKS Film System these tearoffs are meant exclusively for the holeshoot, when visibility is decreased the most.

SCOTT LENS TECHNOLOGIES

FOG RESISTANCE

1 NOFOG™ ANTI-FOG LENS TREATMENT

SCOTT lenses undergo a permanent NoFog™ treatment process to prevent condensation and fogging.

2 AIR CONTROL SYSTEM (ACS)

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

DOUBLE LENSES

Spacer Foam and Double Lenses block moisture and eliminate fogging, while allowing for optimal breathability.

6

WORKS TECHNOLOGY

3 WORKS LENSES

WORKS single lenses are built with factory installed WORKS adjustable tearoff pins and can adapt to fit the WORKS film system. WORKS lenses are made from polycarbonate material to maintain impact resistance and provide 100% UV protection.

4 ASYMMETRICAL TEAROFF PIN SYSTEM

The SCOTT WORKS asymmetrical tearoff pin system features one stationary pin and one adjustable pin. The adjustable pin allows for micro tuning of the tearoff tension and perfecting of the fit according to the rider's preference. Both pins can easily be removed to fit the WORKS film canisters.

SCOTT TRUVIEW

5 SCOTT PRECISION OPTICS

SCOTT Precision Optics is a quality label which stands for premium materials and innovative manufacturing techniques. This unique combination enables us to offer distortion free, UV protected, high performance lenses of the best quality.

6 IMPACT RESISTANCE

In order to ensure that riders are safe from the impact of pebbles and flying debris all SCOTT lenses not only meet, but exceed the required impact resistance standards required for MX lenses.

100% UV PROTECTION

All SCOTT lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.
