GOGGLES

—

SCOTT PROSPECT

THE NEW SCOTT PROSPECT GOGGLE STARTS A NEW CHAPTER IN A VERY DECORATED GOGGLE HISTORY HERE AT SCOTT. CAPITALIZING ON 45 YEARS OF EXPERIENCE, THE SCOTT PROSPECT PUSHES THE LIMITS OF FIELD OF VISION, COMFORT AND LENS RETENTION. OUR NEW, INNOVATIVE LENS LOCK SYSTEM NOT ONLY INCREASES IMPACT RESISTANCE, BUT WILL KEEP THE LENS IN THE FRAME REGARDLESS OF HOW ROWDY YOUR RIDE GETS. KILLER LOOKS, A MASSIVE FIELD OF VISION, AND CLEVER FEATURES FOR RIDING IN ANY WEATHER CONDITIONS- GRAB THESE GOGGLES AND GET READY TO ROOST.

CLEAR AFC LENS

NOSEGUARD

COMPATIBLE WITH THE NEW WFS 50

The SCOTT Prospect is the only MX goggle compatible with SCOTT's revolutionary roll off system: WFS50. The low nose design of these goggles makes the installation of the 50mm film possible and the pivoting outriggers enable a slick integration of the canisters for an unmatched look even with the roll offs mounted. The new WFS50 also features a quick and tool-less canister installation with the SCOTT Click-On technology.

SPECIAL FEATURES

MASSIVE FIELD OF VISION

The larger lens combined with a thin frame construction brings the lens closer to your eyes maximizing the overall field of vision.

3.2 THERMOFORMED FACE FOAM

This technology channels sweat away from the face while relieving pressure from the nose. The first layer draws sweat away from the face, the middle layer absorbs sweat and the third fleece layer creates a comfortable fit and seal.

PIVOTING OUTRIGGERS

The two pivoting outriggers adapt to any helmet shape. Pressure created by the goggle on the rider's face provides a good seal.

SCOTT PROSPECT GOGGLE

246428

The Prospect is a new highlight among MX goggles and has never been on the market like this before. It gives the rider a maximum field of vision due to the extra height of the lens. In addition, it features an innovative SCOTT lens lock system that makes the lens stay in the frame no matter what impact is coming from outside. To avoid slipping of the goggle, it is equipped with an extra wide, no-slip silicone strap. This strap together with articulated outriggers, highly contribute to the improvement of the helmet integration. Last but not least, a great feature of the Prospect is that it comes with two lenses – chrome and clear - ideal for any weather conditions.

FIT: Regular

SCOTT WORKS FILM SYSTEM 50

TEN YEARS AGO, SCOTT RAISED THE BAR IN ROLL OFF TECHNOLOGIES WITH THE INTRODUCTION OF ITS OWN SYSTEM AND HAS SINCE PROVIDED A RELIABLE PRODUCT FOR THE MOST DEMANDING OF WEATHER CONDITIONS. FOR THE 2017 COLLECTION, SCOTT LAUNCHES ITS BRAND NEW WFS 50, A LARGER AND MORE FINE-TUNED ROLL OFF SYSTEM TO ONCE AGAIN DEFINE THE STANDARD FOR THIS MARKET.

1 ANTISTICK GRID AND TRANSP. MUDFLAP

A larger film requires a redesigned and optimized antistick grid with mudflap. A thin vertical line has been added in the middle of the grid to make sure the film never sticks to the lens. Moreover, the mudflap is made out of a transparent material to offer a larger field of vision in dusty or less extreme conditions.

2 INTEGRATED CANISTER DESIGN

The canisters being positioned behind the pivoting outriggers results in an increase in field of vision. The canister integration results in a more fluid look, achieving necessary style points.

3 LARGE 50MM FILM (UP TO 50 CLEAR VIEWS)

When mud comes into play, the extra inch of field of vision can be the difference between finishing first or second. With SCOTT's new WFS 50, the height of the film has been increased by 56 % to become the largest on the market with no less than 50 millimeters. Combined with a thin frame construction, the WFS 50 offers up to 50 clear views of massive field of vision, even in the most challenging of racing conditions.

CLICK-ON CANISTERS

A new feature of the WFS 50 is SCOTT's Click-On attachment system. No need for tools, no need to waste time; simply click the canisters onto the WORKS pins and ride. The red lever makes sure the canister is safely attached to the pins. This system is the ultimate in WORKS technology: switching from roll offs to tear offs has never been this easy.

fluo red/black
clear works-5408113

black
clear works-0001113

SCOTT PROSPECT WFS GOGGLE

246429

The Prospect WFS possesses the same great features than the Prospect goggle. It is equipped with a WFS roll-off system featuring a 50mm film for a large field of vision even in the muddiest conditions. New is, that the canisters can be clipped directly on the WORKS pins of the lens which makes their installation much easier and less time consuming. It also makes the switch from roll-off to tear-off simple and fast. The improved anti-stick grid offers a better field of vision, an easier installation in the canisters, a better sliding on the lens and a better sealing with the lens at the top.

FIT: Regular

FRAME TECHNOLOGIES

- + 50mm Works Film System canisters
- + SCOTT anti-stick grid with mudflap

SCOTT SPECIAL FRAMES

DAMN GOOD FRAMES

SCOTT'S BEST FRAMES OPTIMIZED FOR SPECIFIC PRACTICES: ENDURO AND SANDY RACES

ENDURO

ALFREDO GOMEZ

"I really like the SCOTT products because they are very technical and thought to the last detail"

ENDURO FRAME FEATURES

DOUBLE LENSES

Spacer Foam and Double Lenses block moisture and eliminate fogging, while allowing for optimal breathability

AIR CONTROL SYSTEM (ACS)

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle. The result is a sophisticated ventilation system that helps prevent condensation and fogging.

ANTIFOG ON INNER LENS

Enduro double lenses include a soft inner lens which features a stronger built-in antifog solution than any other SCOTT lenses. When riding Enduro races fog should never be an obstacle.

SAND DUST

JOAN BARREDA
 "The MX Sand Dust Goggle protects me from the smallest sand grain. It brings me through the toughest conditions out in the desert."

SAND DUST FRAME FEATURES

SMALL PARTICLE VENT FOAM MEMBRANE

To avoid any sand or dust sized particles to get into the frame, all SCOTT Sand Dust goggles are mounted with a closed cell membrane instead of the traditional open cell vent foam. This technology guarantees perfect isolation from the elements.

DARK GREY LENS CAT. S2

Riding in dusty or sandy conditions usually comes with sunny weather which is the reason why SCOTT Sand Dust goggles are equipped with a darker grey lens. This lens offers comfort for the eyes and reduces the dazzling effect.

DOUBLE LENSES

Spacer Foam and Double Lenses block moisture and eliminate fogging, while allowing for optimal breathability.

SCOTT FOAM TECHNOLOGIES

3.2 THERMOFORMED FACE FOAM

SCOTT'S PREMIUM 3.2 THERMOFORMED FACE FOAM HAS BEEN UPDATED AND OPTIMIZED FOR THE NEW PROSPECT GOGGLES TO OFFER THE SAME GREAT COMFORT AND SWEAT MANAGEMENT WHILE IMPROVING THE OVERALL FIT. THE NEW CLOSED CELL FOAM IS NOW SOFTER AND HAS BEEN DESIGNED TO SIT LOWER ON THE CHEEKS OFFERING AN EVEN SPREAD OF PRESSURE.

FIRST LAYER

Closed cell foam draws sweat away from the face and protects the other layers against splashes

SECOND LAYER

Open cell foam absorbs sweat and guarantees a perfect fit

THIRD LAYER

Comfortable fleece brings a nice feel on the skin

OTHER FOAM TECHNOLOGIES

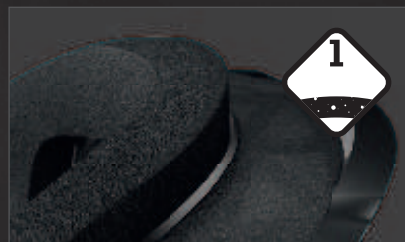

3-LAYER FACE FOAM

SCOTT's 3-Layer Face Foam incorporates two layers of foam and one layer of fleece. The first layer maximizes sweat retention and provides cushioning from the frame, the second layer ensures a precise comfortable face fit and the third layer acts as barrier between the goggle and rider's face.

2-LAYER FACE FOAM

This two-layer open celled face foam with fleece has excellent moisture absorbing and thermal properties, guaranteeing that you stay warm, dry, and comfortable all day.

SINGLE LAYER FACE FOAM

SCOTT's Single Layer Face Foam provides a precise fit around facial features while sealing out the elements. This single density foam is comfortable and has moisture retention properties.

SCOTT WORKS LENSES

WORKS LENSES FEATURE SCOTT'S HISTORIC TECHNOLOGY THAT ENABLES THE RIDER TO USE THE SAME LENS FOR BOTH TEAR OFFS AND ROLL OFFS. THE DO IT ALL LENS. THANKS TO THE FACTORY INSTALLED WORKS PINS, SCOTT ROLL OFF SYSTEMS OR TEAR OFFS CAN BE EASILY AND QUICKLY MOUNTED AND REMOVED DEPENDING ON THE RACE PROFILE AND WEATHER CONDITIONS.

2-PIN WORKS LENSES

Our historic SCOTT WORKS asymmetrical tearoff pin system features one stationary pin and one adjustable pin. The adjustable pin allows for micro tuning the tearoff tension and for perfecting the fit according to rider preference. Both pins can easily be removed to fit the Works Film system.

NEW 4-PIN WORKS LENSES

For the larger lens on the new SCOTT Prospect goggles the 4 pins provide more stability for the tear offs. With this system the tear offs will always remain tight to the lens and provide the rider a better vision.

SCOTT PRECISION OPTICS

SCOTT Precision Optics is a quality label which stands for premium materials and innovative manufacturing techniques. This unique combination enables us to offer distortion free, UV protected, high performance lenses of the best quality.

100% UV PROTECTION

All SCOTT lenses are optically engineered to screen out 100% of harmful UVA/UVB rays.

IMPACT RESISTANCE

In order to ensure that riders are safe from the impact of pebbles and flying debris all SCOTT lenses not only meet, but exceed the required impact resistance standards required for MX lenses.
