NO SHORTCUTS

NO SHORTCUTS

NO SHORTCUTS

Like the modest champion sitting in the corner listening as others spit their egos all over each other, SCOTT quietly lets its achievements, its victories, its skills speak for themselves. We don't make products for those who yearn to be noticed. We make them for those who are going to do what they do whether there's anyone watching or not.

If you're like us, you say what you say, do what you do, ride where you ride because you love it. You do it the right way. You do it for the right reasons.

Use a damp cloth to wipe off any dirt, or brush it off under running water. Spray the damp clothing with Nikwax Leather Cleaner™ and clean. Avoid the reflective and fabric areas. Wipe the outer material with a clean, damp cloth.

Shake out the creases well and hang to dry at room temperature. Lay heavy items flat on a towel and allow to dry.

If the leather is still slightly damp, knead gently by hand to keep it soft and supple!

Once dry, pull it lengthways and crossways and give it a thorough rub.

Where necessary, treat the dry or wet clothing with Nikwax Leather Restorer™. Avoid the reflective and fabric areas. If any dull streaks appear once the leather is dry they can be rubbed off with a dry cloth.

FUNCTIONAL TECHNOLOGIES

FIDLOCK® MAGNETIC SNAP SYSTEM

This snap/magnet combination unites the convenience of a magnetic fastener with the stability of a mechanical snap.

STORM CUFF WITH THUMB LOOP

Built to optimize water resistance, the Storm Cuff with Thumb Loop provides a comfortable solution to prevent water from enter between the glove and cuff.

FLEXFIX

This collar solution eases the fastening of the collar through the usage of a magnet to guide the closure. Combining this with the strong YKK snap secures the collar in place with minimal effort. This system also allows for the collar to be securely fastened in the open position to prevent it from fluttering in the wind.

DIRECT VENTILATION

In products that feature direct-laminated construction the outer membrane is fused together with the lining and insulation. Unlike in traditional jacket and pant construction, opening a direct ventilation allows for air circulation to penetrate all the way to the surface of the skin. Maximizing temperature control and cooling effectiveness.

TEETHLESS ITD WATERPROOF ZIPPER

A completely waterproof solution, the Teethless ITD Waterproof Zipper creates a seamless seal, locking out water. To optimize usage its best to use some SLIP OIL (main ingredient non-toxic silicone) on the surface of the zipper after washing for smooth operation.

HYBRID PROTECTOR POCKET

The Hybrid Protector Pocket is located at either the knee or the elbow to facilitate the personal adjustment of joint protection. Each pocket has two positions giving the rider the option of lowering or raising the protector 30mm. This precise adjustment can make all the difference in ensuring riding comfort and maximizing safety.
