NO SHORTCUTS

NO SHORTCUTS

NO SHORTCUTS

Like the modest champion sitting in the corner listening as others spit their egos all over each other, SCOTT quietly lets its achievements, its victories, its skills speak for themselves. We don't make products for those who yearn to be noticed. We make them for those who are going to do what they do whether there's anyone watching or not.

If you're like us, you say what you say, do what you do, ride where you ride because you love it. You do it the right way. You do it for the right reasons.

INNOVATION TECHNOLOGY DESIGN

SINCE 1958 SCOTT SPORTS HAS PUSHED THE LIMITS OF INNOVATION, TECHNOLOGY AND DESIGN. FROM THE FIRST ALUMINIUM SKI POLE, TO THE INTRODUCTION OF AERO BARS AND THE ORIGINAL PLASTIC MOTO CROSS BOOT, WE HAVE LED THE WAY IN THE SPORTS INDUSTRY. COMBINING ENDLESS DETERMINATION TO IMPROVE WITH THE METHODICAL INTRICACY PUT INTO EACH PRODUCT, SCOTT PREPARES ATHLETES TO REACH THEIR HIGHEST POTENTIALS. THE 2019 COLLECTION EXEMPLIFIES THIS MENTALITY AND THE UNIFICATION OF OUR THREE CORE PHILOSOPHIES. WHEN YOU PUSH YOURSELF TO THE LIMIT SCOTT WILL STAND BY YOU AND HELP YOU SURPASS WHAT EVEN YOU BELIEVED WAS IMPOSSIBLE. LET OUR PASSION BECOME YOUR PASSION AND YOUR SUCCESSES BECOME OUR SUCCESSES.

ELEVATE YOUR SAFETY

WE DEVELOP, TEST AND RE-TEST IN ORDER TO PERFECT OUR PRODUCTS OVER YEARS AND YEARS. OUR GOGGLES, BODY PROTECTION OR BAGS GIVE YOU THAT EXTRA BIT OF SAFETY IN THOSE CRUCIAL AREAS OF YOUR BODY WHEN IT COUNTS. REGARDLESS IF YOU ARE OUT IN DEEP SNOW, ON TRAILS OR ANYWHERE ELSE - „ELEVATE YOUR SAFETY“ WITH SCOTT - WE'VE GOT YOU COVERED.

WE GO BEYOND THE STANDARDS

SCOTT Sports has pushed the limits of innovation, technology and design and consequently is also pushing the limits of safety. Especially in sports like Snowmobile safety has very high priority. It is not only the human power but also the engine power beneath the rider that asks for this extra level of safety.

We at SCOTT are proud that our wide protection expertise, gained from our different sport involvements, allows us to push safety beyond standards. When you push yourself to the limit SCOTT will stand by you and help you surpass what even you believed was impossible.

We take the statement “Elevate your Safety” serious and don't award every product. Items in this category provide you with safety above standards. Convince yourself by checking out the “Elevate your Safety” Snowmobile products.

CHRIS BROWN

“The SCOTT Prospect Snowcross has the best field of vision of all goggles that I’ve ever had. Fogging is a thing of the past and I don’t need to bring a spare pair of goggles into the backcountry anymore! I can fully trust in my vision.”

MASSIVE FIELD OF VISION

We at SCOTT are proud to offer the largest field of vision on the market with the Prospect goggle. The larger lens combined with a thin frame construction brings the lens closer to your eyes maximizing the overall field of vision.

BIG 3 LAYER FACE FOAM

SCOTT's 3-Layer Face Foam incorporates two layers of foam and one layer of fleece. The first layer maximizes sweat retention and provides cushioning from the frame, the second layer ensures a precise comfortable face fit and the third layer acts as barrier between the goggle and rider's face.

LENS LOCK SYSTEM

The Lens Lock System by SCOTT has been designed to guarantee the safest lens retention on the market. To avoid the lens coming out, SCOTT has designed this innovative lens lock system which features 4 locking pins that go through the lens instead of grabbing it from the top.

PIVOTING OUTRIGGERS

The two pivoting outriggers adapt to any helmet shape. Pressure created by the goggle on the rider's face provides a good seal.

SCOTT BUZZ PRO SNOW CROSS GOGGLE

262588

Especially designed for junior riders, the SCOTT Buzz Pro Snow Cross Goggle is optimized for smaller faces. It provides a maximum field of vision, not to miss out on anything while riding. The no-slip silicone strap gives perfect goggle stabilization which makes it a perfect choice for junior riders looking for the best SCOTT technologies.

SCOTT FRAME TECHNOLOGIES

FRAME VENTILATIONS

ALL-AROUND VENTILATION

Frame Ventilation is optimized around the entire frame in order to channel air flow onto the lens, as opposed to the eyes. This technology blocks snow and water from entering the goggle.

HELMET COMPATIBILITY

SILICONE LINE

An adhered silicone strip on the inside of the goggle strap ensures the goggles stay right where they should on a helmet or hat.

INTEGRATED DESIGN

SCOTT goggles are engineered to engage flawlessly with a variety of helmets, including SCOTT's entire helmet line.

FACEMASK

Designed for harsh weather conditions SCOTT snowmobile goggles include facemasks that provide additional protection from the wind and cold.

PIVOTING OUTRIGGERS

The Prospect has two pivoting outriggers that adapt to any helmet shape and size. The resulting pressure created by the goggle on the rider's face provides a complete and consistent seal.

COMFORT

BIG 3-LAYER MOLDED FACE FOAM

SCOTT's premium large face foam does not only feature two layers of foam and one layer of fleece for ultimate fit and comfort, but also has pre-shaped nose foam to avoid any pressure points in this critical area.

BIG TWO-LAYER MOLDED FACE FOAM

This large, two-layer open celled face foam with fleece has excellent moisture absorbing and thermal properties, guaranteeing that you stay warm, dry, and comfortable all day.

BIG SINGLE-LAYER FACE FOAM

Thanks to the large, soft, single density face foam, a precise fit around facial features is provided while sealing out the elements.

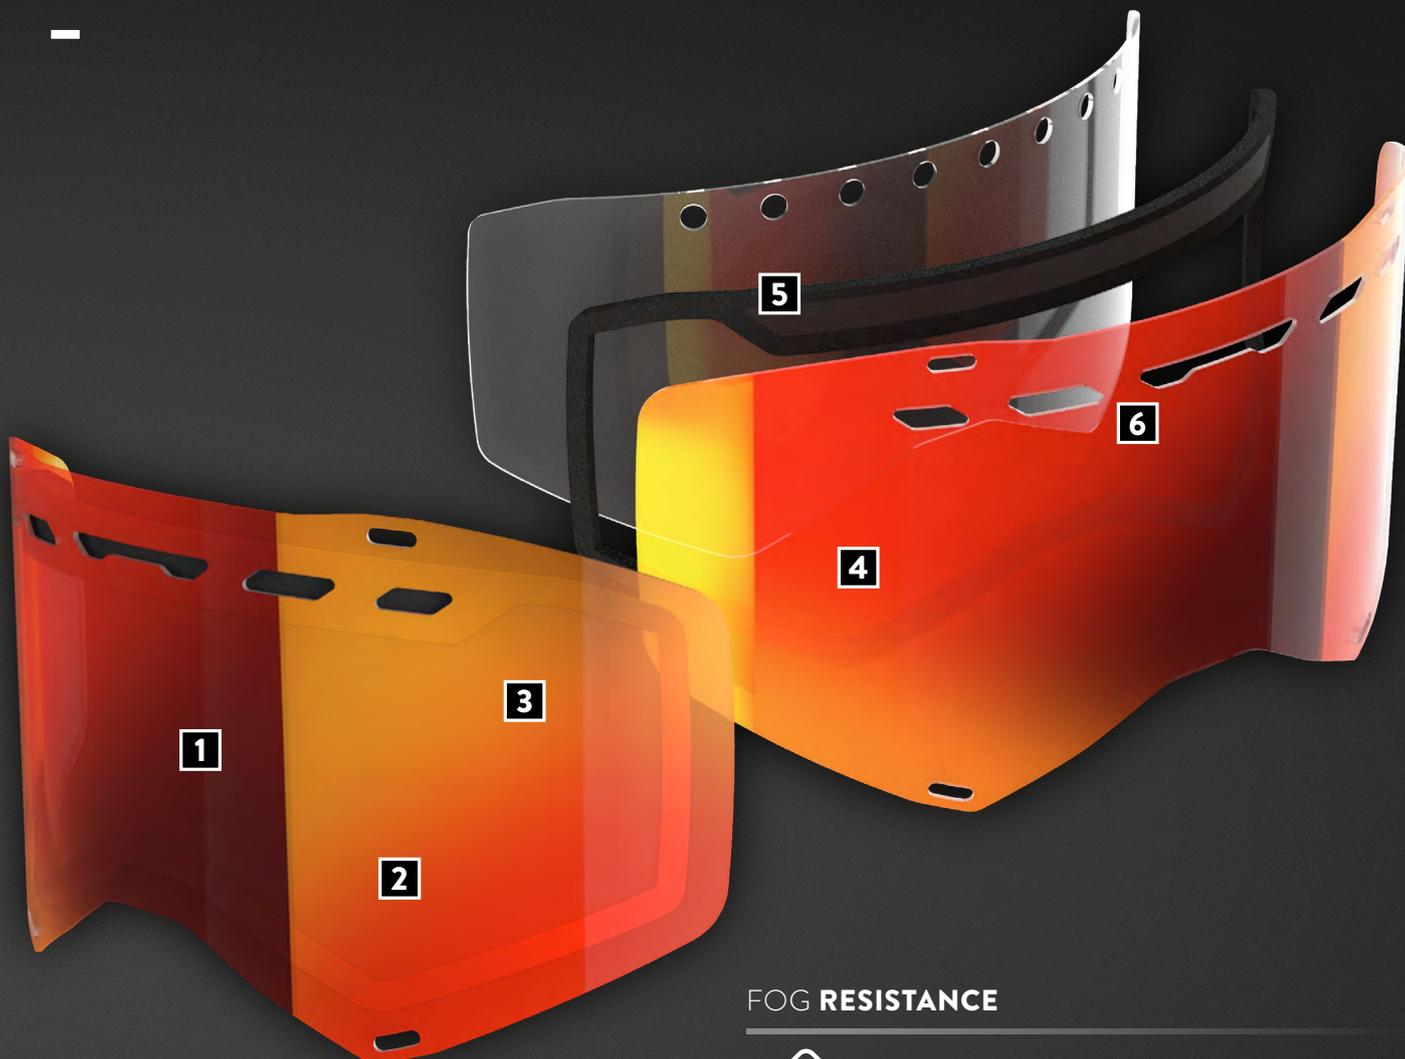

LENS RETENTION

LENS LOCK SYSTEM

The innovative lens lock system features 4 locking pins that go through the lens instead of grabbing it from the top. Like this the lens stays in the frame no matter what.

SCOTT LENS TECHNOLOGIES

LENS SHAPES

1. CYLINDRICAL LENS

Cylindrical lenses curve from left to right, and are flat from top to bottom. These are low profile, flexible, and offer a unique look.

EXTERNAL COATINGS

2. HARD COATING

SCOTT hard coating creates a permanent bond with the lens that reduces the appearance of hairline scratches and provides overall lens durability.

3. CHROME COATING

SCOTT chrome coating offers unmatched style for your goggles while controlling light transmittance.

FOG RESISTANCE

4. ANTIFOG COATING

SCOTT lenses undergo a permanent NoFog™ treatment process to prevent condensation and fogging.

5. SPACER FOAM AND DOUBLE LENSES

Spacer Foam and Double Lenses block moisture and eliminate fogging, while allowing for optimal breathability.

6. AIR CONTROL SYSTEM (ACS)

ACS ventilation incorporates lens air intake vents on the goggle lens and frame air outtake vents on the bottom of the goggle.

OUTER LENS TECHNOLOGIES

SCOTT OPTIVIEW

These European manufactured lenses are made of polycarbonate (material,) ensuring comfort and high-impact resistance. SCOTT's proprietary injection molding process and hard coat treatment guarantees that every OptiView lens is optically correct and distortion free. SCOTT OptiView lenses are available as spherical or cylindrical.

SCOTT TRUVIEW

These European manufactured lenses are made of extruded and thermoformed sheets of selected celluloses (CA/CP/PC). TruView lenses pass SCOTT's strict testing procedures delivering high quality, performance lenses. SCOTT TruView lenses are available as cylindrical double or single lens.

AMPLIFIER LENS TECHNOLOGY

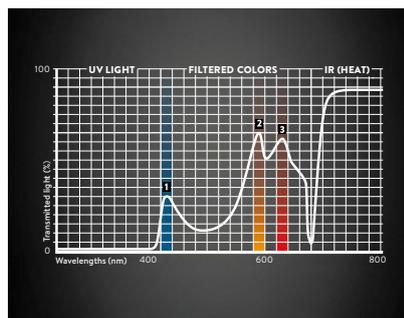

Amplifier is a lens technology which utilizes a unique light transmission curve to optimize contrast and clarity.

amplifier
LENS TECHNOLOGY

THE HISTORY

As one of the industry leaders in high performance optics, Scott Precision Optics was launched with the introduction of revolutionary Amplifier patent in 1999.

THE SCIENCE

The unique aspect of Amplifier Technology is the shape of the visible light transmission curve. The Amplifier Technology optimizes the transmission of three specific wavelengths – Blue light, Orange Light, Red Light. These ranges of light are the most important for the human eye to enhance contrast and clarity.

THE FUNCTION

Optimized for different lighting conditions, the Amplifier technology filters the balance of visible light transmitted through the lens to provide more contrast and clarity.

LENS CONSTRUCTION – Amplifier Technology is fully integrated into SCOTT's very own PC lens. Part of a total of 9 layers, the Amplifier goggle lens is unique and will let you charge down any terrain covered in snow.

THE RANGE

Amplifier Technology is available on all SCOTT lenses from cat. 1 to cat. 3 as well as Light Sensitive.

SCOTT LENS OVERVIEW

EACH CATEGORY OF LENS NOW COMES WITH THE AMPLIFIER LENS TECHNOLOGY.

LIGHT SENSITIVE

CAT. S13 ☀️ ☁️

ADAPTS THE SHADE OF THE LENS TO GET THE BEST CONTRAST FOR EVERY LIGHT CONDITION

SCOTT's Light Sensitive lenses engage photo-chromic technology and adapts automatically to sunlight intensity. These lenses react to light changes and within seconds the lens will either darken when the brightness gets stronger or lighten when the sunlight gets weaker. SCOTT's Light Sensitive innovative lens construction guarantees no influence from cold temperatures on the photochromic efficiency.

ILLUMINATOR

CAT. S1 ☁️

INTENSIFIES DEFINITION IN FLAT LIGHT CONDITIONS

The SCOTT Illuminator lens has been developed to let almost 90% of yellow and orange wave lengths pass the lens and emphasize the brightness perception, while shutting out the bad light to maintain a very good level of contrast and depth of perception.

ENHANCER

CAT. S2 ☁️

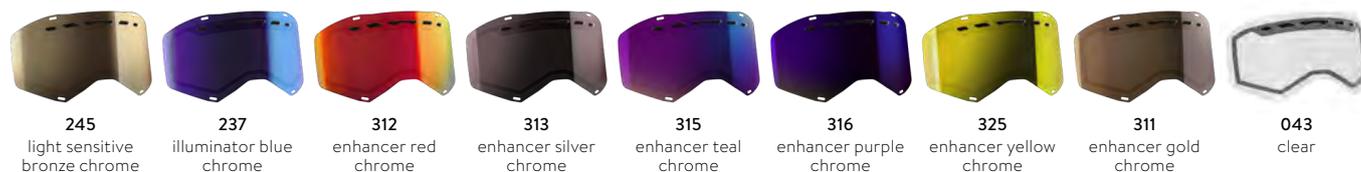

ENHANCES CONTRAST IN OVERCAST AND MIXED CONDITIONS

When riding in mixed and overcast light conditions, the enhancer lens has the perfect tint. Letting in slightly more light than the Illuminator and paired with the Amplifier technology, this lens will help your eyes see every detail on the mountain.

SCOTT MX 550 HELMET – GET YOUR HEAD IN THE GAME

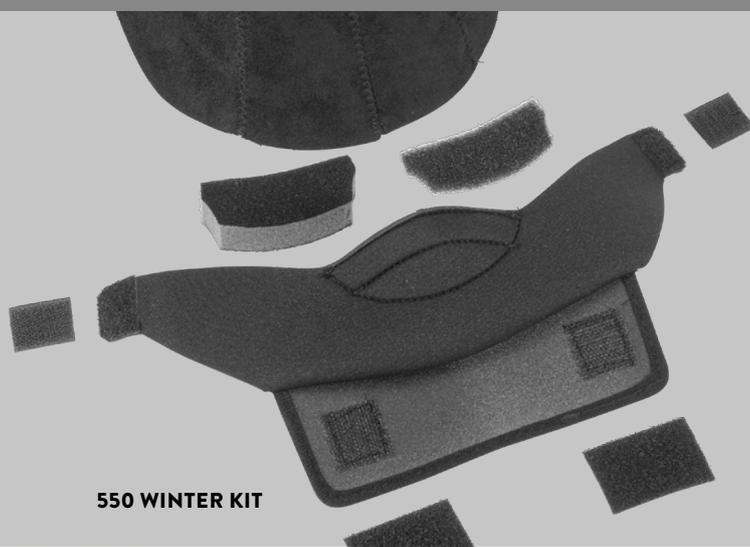

THREE YEARS AGO WE SAT DOWN WITH OUR ATHLETES TO DEFINE WHAT EXACTLY THE REQUIREMENTS WERE FOR THE SPORTS THAT THEY PRACTICE. THE TWO MAIN REQUIREMENTS THAT THEY HAD FOR THEIR HELMETS WERE VENTILATION AND SAFETY. TODAY WE ARE EXTREMELY PROUD TO MEET THEIR NEEDS AND TO SET NEW STANDARDS WITH OUR MX550 HELMET.

SSO
SERIES

ADJUSTABLE VENTILATION

The MX550 helmet is your perfect companion throughout the full snowmobile season. As it is the most ventilated helmet on the market it will cool your head down like no other during intense rides and sunny spring riding days. For cold days you can close the vents with the winter kit to avoid air flowing through the helmet. Get the MX550 and be prepared for any weather condition!

RADIAL IMPACT
ANGULAR IMPACT

CONEHEAD

For radial impact we have introduced Conehead Technology to our helmets. It is a unique construction that has two different densities of EPS. This increases the impact absorption of the helmet.

SAFETY AS PRIORITY

We take safety seriously and the helmet team at SCOTT is passionate about it. We see it as our key goal of who we are and the helmets that we produce. Riders experience two types of impacts – radial impacts which are impacts straight into the head and angular impacts which cause rotational violence. With the MX550 we address both by using Conehead and MIPS technologies.

To protect the brain from rotational violence we have introduced the revolutionary MIPS brain protection system. MIPS is a low friction layer inside the helmet which allows the head to rotate relative to the helmet in an angled impact. This substantially reduces rotational violence and the potential for damage to the brain.

APPAREL TECHNOLOGIES

SHELL FABRICS

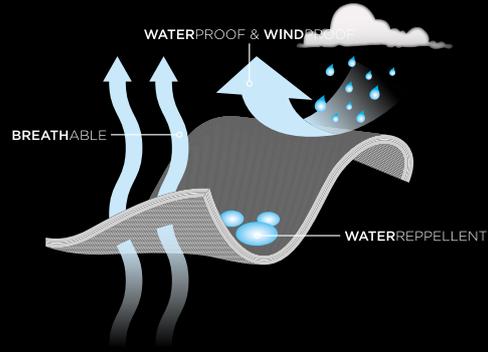

GORE-TEX®

Garments engineered with GORE-TEX® technology are durable, water and windproof, and feature optimal breathability. They are built to maximize protection and comfort. GORE-TEX® products are created by laminating the GORE-TEX® membrane to high-performance textiles. In order to guarantee a waterproof product, the seams on the entire garment are sealed with GORE-SEAM® tape technology.

Z-LINER 2 LAYERS 3 LAYERS

DRYOSPHERE

2 & 3 layer shell fabrics with a polyurethane layer bonded to the underside combined with DRYOzone DWR on the outermost surface provides a minimum capability of 10,000mm water pressure resistance & 10,000 g / m² / 24h moisture transport performance.

Z-LINER 2 LAYERS 3 LAYERS

WATER ZIPPER

WaterR is a durable water-repellent treatment used to enhance YKK's range of aqua zippers. YKK's WaterR treated items are available for a variety of functions in both Coil and Vislon® and helps to reduce water seepage and wicking in outer shell garments and equipment. All our YKK WaterR zippers passed the Gore-tex® approval for SMB garments.

AQUAGUARD®

AquaGuard® is a water-repellent zipper. It is created by laminating PU on the textile tape, the PU layer is acting as a membrane. YKK's AquaGuard® items are available for a variety of functions in both Coil and Vislon®. It is the most commonly used zipper solution for quality rain and wind proof outer shell garments. Unlike standard PU coated items, the superior Aquaguard® range withstands an extensive shower test and does not absorb water.

SCOTT MAPPING ZONES

The SCOTT mapping zones provide significant enhancements in terms of insulation, comfort and temperature control in our SMB clothing. A perfect feel and balanced temperature control are ensured by intelligently combining 3D mesh, breathable mesh lining and soft taffeta in select positions. Partial quilting and reinforcement in exposed areas enhance insulation and function without compromising comfort for the wearer.

Taffeta combined with breathable mesh

Breathable mesh combined with 3D mesh

LAYERING

POLARTEC® POWER DRY®

Fabrics designed to keep your skin dry when you sweat. Superior wicking action, high breathability and a quick drying function make these pieces always feel comfortable next to skin.

INSULATED MOBILE DEVICE POCKET

The insulated mobile device pocket is a napoleon pocket which keeps your electronic device dry and warm. To the outside this pocket is insulated with 100 grams of isolation to preserve the battery of your mobile phone charged.

To the inside, the napoleon pocket is equipped with a water vapor permeable textile to keep out sweat during extensive riding sessions.

SCOTT HARD PROTECTION

COMMANDER PROTECTIVE SYSTEM

THE SCOTT COMMANDER SETS NEW STANDARDS WITH INNOVATIVE, LIGHTWEIGHT AND IMPACT ABSORBING MATERIALS PLACED IN KEY AREAS WHICH OFFER AN ADJUSTABLE ERGONOMIC FIT AND UNPRECEDENTED COMFORT. THE COMMANDER BODY ARMOR FULFILLS ALL REQUIRED SAFETY STANDARDS AND A NEW REVOLUTIONARY NECK BRACE INTEGRATION CONCEPT.

THE PATENTED INDEPENDENT FLOATING MID PLATE SYSTEM ON BACK ALLOWS A PRECISE INCORPORATION WITH NECK BRACE AND A REAL FREEDOM OF MOVEMENT. NO MORE COMPLICATED ADJUSTMENTS, NO NEED TO REMOVE PLATES: JUST PUT YOUR NECK BRACE ON AND YOU ARE READY TO RIDE.

TOTAL MOBILITY. COMFORTABLE FIT

On the back: the slot connections of the plates are wider to allow a better movement and the foam has a special shape to ensure better flex.

On the chest: The front is split in 5 panels to ensure more ranges of movement and wrap your chest.

FULL MOISTURE MANAGEMENT

Air circulates through the holes and mesh fabric to effectively manage efficiently moisture in your back and chest.

PERFECT LEATT® INTEGRATION

The back plates are split in 2 parts to emphasize the incorporation with the neck brace. The strut of the brace can follow your movement without making any pressure on the back plates.

BEST RATIO PROTECTION/THICKNESS

The back protector is built with thin and advanced high density foam allowing reducing the thickness but still passing well all required tests.

SAFE CLOSURE

The ratchet buckles allow to adjust your fit and to be safe packed into your protection..

SCOTT VERTEBRAE PROTECTIVE SYSTEM

The SCOTT Vertebrae system was awarded several times for its innovative and unique construction. The plate system mimics the vertebrae, articulating in 3 axes to ensure free lateral extension and compression movements, resulting in complete freedom of movement and the highest level of protection.

ARTICULATING HARD PROTECTION

The hard plastic plates are joined using an innovative rivet system allow the plates to move freely with the body, maximizing comfort and freedom of movement.

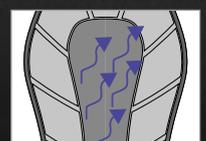

HIGH PROTECTION

The Vertebrae system adheres to the highest-level safety standard meaning you get added comfort without sacrificing safety. The 450 model is certifying according to Level 2 of the CE.

FULL MOISTURE MANAGEMENT

Air circulates through the holes of the different layers to effectively manage efficiently moisture in your back.

SCOTT SOFT PROTECTION

SCOTT SOFTCON 2 PROTECTIVE SYSTEM

THE REVOLUTIONARY SOFTCON 2 JACKET IS THE MOST FLEXIBLE AND COMFORTABLE SOLUTION TO BE PROTECTED WITHOUT COMPROMISING PROTECTION. COMBINING INNOVATIVE D3O MATERIALS AND A UNIQUE DESIGN THE NEW SOFTCON 2 DELIVERS UNPARALLELED FREEDOM OF MOVEMENT WHILE REMAINING HIGHLY PROTECTIVE. ITS BACK AND FRONT ARE LOW PROFILED AND THE SPECIAL DESIGN WITH CHANNELS MAKE THEM EXTREMELY BREATHABLE AND FLEXIBLE

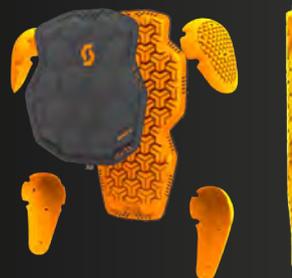

PERFECT NECK BRACE COMPATIBILITY

The recessed shape on front and back allows putting easily the neck brace on the protector without removing any parts and wearing the neck brace on the jersey.

FLEXIBLE AND BREATHABLE D3O® FOAM STRUCTURE

The new Softcon 2 uses D3O® material with a unique design that enhance flexibility allowing the protection to conform to the body and ensure a tight and consistent seal. The unique design combined with the perforation is creating a ventilation system to keep you cool.

LOW PROFILE AND INVISIBLE LOOK

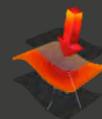

The protection is so thin that it is invisible under the jersey. Shoulder and elbow D3O® protection are specifically designed to be extremely flexible and comfortable and offer an high level of protection

D3O® TECHNOLOGY WITH SCOTT PROTECTIVE SYSTEM

D3O® IMPACT PROTECTION TECHNOLOGY

D3O® is a unique material that focuses on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergetic effects of the polymer-based dilatant. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to disperse the energy throughout the matrix, significantly reducing the effect of impact.

SHOCK ABSORPTION

Unique technology that focuses on energy absorption and protection.

LIGHT & FLEXIBLE

Provides maximum comfort and protection at the same time.

CE CERTIFIED

Integrated D3O® protectors allow for highest levels of safety according to CE EN 1621.
