SCOTT ROAMER PANT

292389

The SCOTT Roamer Pant offers classic motorcycle style with modern features and fit. Constructed with breathable and durable CORDURA® Denim, these pants are both comfortable and built to last! Polyester knitted reinforcements on knee and seat area further increase longevity whilst the flexible D3O® protectors at the knee and hip provide comfortable protection. High height cargo pockets offer plenty of room for your essentials with easy access. All this and more make the SCOTT Roamer Pant the perfect choice for your next ride.

CONSTRUCTION: Breathable and strong CORDURA® Denim, completely covered with Polyester knitted reinforcements on knee and seat area

COMPOSITION: SHELL: 85% Cotton, 15% Polyamide, LINING: 100% Polyester

INSULATION: Comfortable soft and breathable knitted lining

FIT: Regular

SIZE: XS-4XL | DM-T2XL

APPROX. WEIGHT (KG): 1.4kg

FEATURES:

- D3O® LP1 Pro protectors at knee and hip
- Adjustable knee protector pocket
- Reflective panels
- 2 outer pockets and 2 cargo pockets
- Belt loops
- Waist closure with snap and hook

▶ PRIORITY GTX

ADVENTURE IS OUT THERE

NO SHORTCUTS

The top of the line, SCOTT Priority GTX is made for 3 seasons featuring wind- and waterproof 3-layer GORE-TEX construction and Pittards® leather reinforcements. Equipped with D3O® protectors we take care of your safety and allow you to push your limits.

PROTECTED BY
D3O®

APPAREL TECHNOLOGIES

Our research and development team works with leading manufacturers around the world to deliver revolutionary fabric technologies that protect you from the elements, give more comfort to your body and maximize your enjoyment of outdoor activities, 365 days a year.

FABRIC TECHNOLOGIES

GUARANTEED TO KEEP YOU DRY™ PROMISE

For more than 30 years, GORE-TEX products have been delivering comfort and protection so you can enjoy your outdoor activities with confidence. The GORE-TEX membrane is integrated in the garment between the outer material and the lining. It is a perfect barrier to rain and wind, while allowing perspiration to escape. Even in cases of extreme physical exertion, humidity will be transported to the outside of the clothing system and you always stay comfortable in your SCOTT garments engineered with GORE-TEX products.

A DIGITAL LEATHER PRODUCED IN THE UK
Motorcyclists worldwide demand the highest level of performance from their protective equipment.

DEXFIL® Insulation

Thin and lightweight, Dexfil insulation provides superior insulation by trapping high levels of still air in each given space. The incredibly fine denier fabric creates an extraordinary insulating effect that retains its shape and insulating properties even after repeated cleaning.

Little Parts. Big Difference.™

YKK WATERR ZIPPER

WaterR is a durable water-repellent treatment used to enhance YKK's range of aqua zippers. YKK's WaterR treated items are available for a variety of functions in both Coil and Vislon® and helps to reduce water seepage and wicking in outer shell garments and equipment. All our YKK WaterR zippers passed the GORE-TEX approval for SMB garments.

Little Parts. Big Difference.™

YKK AQUAGUARD® ZIPPER

AquaGuard® is a water-repellent zipper. It is created by laminating PU on the textile tape, the PU layer is acting as a membrane. YKK's AquaGuard® items are available for a variety of functions in both Coil and Vislon®. It is the most commonly used zipper solution for quality rain and wind proof outer shell garments. Unlike standard PU coated items, the superior Aquaguard® range withstands an extensive shower test and does not absorb water.

DRYOSPHERE

DRYOsphere fabrics provide a waterproof/breathable barrier from the elements. A shield against water and wind, DRYOsphere fabric also allows for water vapor to escape from the body, keeping you dry and comfortable in any conditions.

C0 DWR OR PFC-FREE

Perfluorinated and polyfluorinated compounds, also known as PFCs, are a group of fluorinated substances that have long been used to provide durable water repellence for clothing in the outdoor industry. They are very bad for the environment because they are very stable and do not easily break down in nature, which is why PFC-free/C0 DWR treatments have been developed. These are less durable but more sustainable.
